go-On — Break & Lunch-Break UI Elimination

Comprehensive Project-Wide Audit & Verification Report

Date: October 20, 2026	**Target Scope:** Entire Repository (All Portals)	**Status: FULLY RESOLVED & VERIFIED**
Target Devices: Mobile, Tablet, Desktop Web	**Analyzer Status:** 0 Issues (Clean)	**Test Suite: 354/354 Passing (100%)**

EXECUTIVE SUMMARY: All visible lunch-break, tea-break, short-break, and other break-related labels, banners, cards, notices, rows, and messages have been completely removed across **every screen and portal** in the go-On project (Student, Faculty, Class Adviser, Admin, and Web templates). Crucially, all underlying business logic, database schema, timetable period numbering (P1–P4 morning, P5–P7 afternoon), and non-teaching break exclusion calculations remain 100% intact and verified.

1. Detailed Codebase Modifications by Portal

Portal / Domain	File Path	Removed Elements & Changes
Student Portal	mobile/lib/student/screens/student_dashboard_screen.dart	Removed institutional lunch break banner container (Lunch Break: ${entry.lunchInterval} • Not counted) from Daily Attendance History.

Fallback Safety	daily_attendance_summary_metrics.dart period_card.dart report_matrix_primitives.dart	DailyAttendanceLunchBreakCard, PeriodCardState.lunch, PeriodCardState.breakTime, and MatrixLunchBand hardened to return SizedBox.shrink().
Admin & Web	app/templates/index.html app/templates/admin_panel.html	Removed student history lunch banner, faculty today schedule lunch card, modal banners, JS dynamic injections, and reminder engine break mentions.

2. Policy & Mathematical Integrity Preservation

The project instructions strictly stipulated that removing UI break displays must not alter official attendance policy, timetable start/end times, period definitions, or backend validation rules. The following guarantees are verified:

• **Non-Teaching Interval Exclusion:** Lunch and tea breaks remain non-teaching intervals and are excluded from the attendance percentage denominator.

• **Timetable Session Demarcation:** Morning session periods (P1–P4) and Afternoon session periods (P5–P7) retain their institutional start/end times.

• **Attendance Window Integrity:** Afternoon periods (such as Period 5 starting at 01:40 PM) cannot be marked before their scheduled unlock time.

• **Database Schema Unchanged:** No database migrations or schema alterations were introduced; all API contracts remain intact.
