go-On — Class Adviser Sunday / No-Class Display Fix

Date: October 20, 2026 | **Scope:** Class Adviser Portal (Mobile & Web) | **Status:** VERIFIED & RESOLVED

Executive Summary: On the Class Adviser Portal (mobile/lib/faculty/screens/faculty_class_advisor_screen.dart), selecting an unscheduled Sunday (such as selecting Sunday, 2026-10-18 from the *Yesterday* tab) previously displayed confusing, unnecessary, and broken UI elements: full-day authority disclaimers, an unneeded summary button, empty morning/afternoon headers with negative notices, and the authoritative 4:10 PM end-of-day cutoff banner.

Resolution: Replaced the empty session sections with a responsive, high-contrast, friendly No-Class state card displaying context-aware titles (*No Classes Today*, *No Classes Yesterday*, *No Classes on Sunday*) and friendly copy. All unnecessary headers, cards, and footer banners are cleanly hidden while preserving full real-timetable integrity, working Sunday support, and error state handling.

1. Problem Analysis & Screenshot Defects

In the reference screenshot (media_1792490929316_8578e4bf.jpg), Sunday was selected under the Yesterday tab:

- **Misleading Role Authority Banner:** Displayed *"Yesterday's Periods (Sunday, 2026-10-18) As Class Advisor, you have full authority to mark or edit attendance for every period (P1–P7)..."* even though no classes existed.
- **Redundant Summary Button:** *"View Daily Half-Day Summary for this date"* was visible when zero records or periods existed.
- **Cluttered Empty Session Lists:** Displayed formal *MORNING SESSION (P1–P4)* and *AFTERNOON SESSION (P5–P7)* headers paired with *"No morning/afternoon timetable periods scheduled."*
- **Irrelevant 4:10 PM Banner:** Showed *"Authoritative College Day Ends at 4:10 PM"* on a non-working day.

2. Engineering Solution & Implementation

The following structural improvements were applied in mobile/lib/faculty/screens/faculty_class_advisor_screen.dart:

- **Context-Aware Dynamic Titles:** Implemented _getNoClassesTitle() taking tabIndex and isSunday into account. It outputs *'No Classes Today'* (Tab 0), *'No Classes Yesterday'* (Tab 1), *'No Classes on Sunday'* (Past Dates), and *'No classes scheduled for this date'* (non-Sundays).
- **Friendly No-Classes Card:** Implemented _buildNoClassesCard() with smooth card styling, peaceful icon (Icons.hotel_class_rounded), bold 18pt typography, and warm subtitle: *"There are no scheduled classes on Sunday. Enjoy your day off!"*.
- **Streamlined Sunday View:** When periods.isEmpty, Morning/Afternoon session headers, empty session cards, and the 4:10 PM banner are omitted. Pull-to-refresh remains functional.
- **Conditional Summary Button:** Guarded *View Daily Half-Day Summary* so it is only displayed if real attendance records exist on that date.
- **Working Sundays Preserved:** If periods are configured on Sunday, the timetable displays normally with full attendance marking/editing capabilities.
- **Error State Preservation:** API or network errors display the retry card with a dedicated button rather than misrepresenting a network glitch as a holiday.

3. Automated Test Verification Results (8 Scenarios)

#	Scenario / Date Tested	Expected Behavior & Content	Result
1	Today is Sunday (0 periods)	Displays **No Classes Today** & Sunday off copy	**PASS**
2	Yesterday was Sunday (0 periods)	Displays **No Classes Yesterday** (Fixes bug)	**PASS**
3	Past Dates tab (Previous Sunday)	Displays **No Classes on Sunday**	**PASS**
4	Weekday with scheduled classes	Renders morning & afternoon sessions normally	**PASS**
5	Weekday without scheduled classes	Displays **No classes scheduled for this date**	**PASS**
6	Sunday with configured periods	Renders periods and attendance marking buttons	**PASS**
7	API / Network loading error	Displays Error State with Retry button (not holiday)	**PASS**
8	Dark Theme Contrast	High contrast verified using dark theme tokens	**PASS**

4. Regression Testing & Static Analysis

- flutter analyze: **0 issues found** (Clean tree, zero warnings/errors).
- class_advisor_sunday_no_class_test.dart: **8 of 8 passed**.
- faculty_and_advisor_timetable_matrix_test.dart: **Passed**.
- faculty_class_advisor_lunch_break_removal_test.dart: **Passed**.
- unmarked_class_advisor_entry_test.dart: **Passed**.
- daily_attendance_summary_dialog_test.dart: **Passed**.
- Debug APK build: E:\originalam\app-debug.apk (171 MB) built successfully.
