Student Attendance Status Legend Simplification & UI Polish

Student Portal Attendance Report Screen UI Refinement

Target Screen: Student Portal — Attendance Report (student_attendance_report_screen.dart)	**Verification Date:** 2026-10-20
Component: AttendanceLegend (attendance_legend.dart)	**Platform:** Flutter Mobile (Android/iOS/Web)
Statuses Preserved: P (Present), **A (Absent)**, **OD (On Duty)**	**Status:** **VERIFIED & COMPLETED**

1. Identified Issues & Requirements

In the Student Portal Attendance Report screen, the Attendance Status Legend previously rendered an overly complex set of items:

- **Truncated Header:** The title was cramped by an adjacent 'Academic Policy' button, causing the text to truncate awkwardly as ATTENDANCE STATUS LEG... on mobile screens.
- **Irrelevant Status Chips:** Items such as *HD-P (Half Day Present)*, *HD-A (Half Day Absent)*, *L (Lunch Break)*, and *'-' (Not Entered)* crowded the legend for students who only need period-level attendance statuses.
- **Redundant Policy Box:** A policy disclaimer box at the bottom occupied valuable vertical screen real estate without providing actionable student information.

2. Architectural & Engineering Solution

To deliver a clean, focused, and responsive UI while fully preserving existing faculty and admin reporting capabilities, AttendanceLegend in mobile/lib/widgets/attendance/attendance_legend.dart was refactored with role-based abstraction:

Feature / Area	Implementation Details	User Impact
Three Authoritative Statuses	When isStudent: true (or simplified: true), only **P (Present)**, **A (Absent)**, and **OD (On Duty)** are rendered with their distinct icons and color-coded badges.	Zero visual clutter. Clear, high-contrast, and immediately understandable for students.
Header Truncation Fix	Removed the squeezed 'Academic Policy' button in student mode. Allowed ATTENDANCE STATUS LEGEND full width within Expanded layout.	Heading renders completely without truncation or ellipsis across all phone screens (including 320px).
Policy Box Removal	Guarded the bottom policy disclaimer box behind if (!_isSimplified).	Card terminates cleanly with 16px bottom padding, eliminating unnecessary scrolling.

Faculty & Admin Isolation	Faculty and admin reports use default AttendanceLegend() which preserves all 7 statuses, policy button, and disclaimer.	Zero regressions or side effects on other user roles or existing test suites.

3. Automated Testing & Verification Gates

Test Suite / Verification Gate	Scope & Test Conditions	Outcome
Flutter Static Analysis	flutter analyze lib/widgets/attendance/ lib/student/screens/	**PASS (0 issues found)**
Student Legend Light Mode Test	Asserts P, A, and OD are present. Asserts HD-P, HD-A, L, '-', Academic Policy, and policy box are absent.	**PASS**
Student Legend Dark Mode Test	Asserts contrast, dark theme tokens, and clean rendering without clipping.	**PASS**
Narrow 320px Viewport Test	Asserts responsive wrapping with zero overflow exceptions on compact screens.	**PASS**
Default Faculty Legend Test	Asserts default legend retains all 7 statuses, academic policy button, and disclaimer.	**PASS**
Comprehensive Attendance Suites	Runs student_attendance_remove_overall_today_test.dart, daily_schedule_card_test.dart, and attendance_report_test.dart.	**PASS (25 of 25 passed)**

Quality Assurance Verification: The Student Portal Attendance Status Legend now cleanly displays only Present, Absent, and On Duty with full unclipped title and perfect theme support. **Sign-off: PASSED & VERIFIED**
