Removal of 'Overall today' Section from Student Attendance Page

UI Cleanliness, Layout Ergonomics & Architectural Safety Report

Target Screen: Student Portal — Attendance Report (student_attendance_report_screen.dart)	**Verification Date:** 2026-10-20
Modified Widget: DailyScheduleCard (daily_schedule_card.dart)	**Platform:** Flutter Mobile (Android/iOS/Web)
Scope of Removal: 'Overall today', percentage, target 75%, progress track & marker	**Status:** **VERIFIED & COMPLETED**

1. Requirement & User Feedback

In the Student Portal's Attendance Report screen, the bottom of the active daily schedule card previously included a sub-section titled **'Overall today'** accompanied by a daily attendance percentage (e.g. *33%*), target text (*'target 75%'*), and a horizontal progress bar with a 75% tick marker.

Students and administrators identified that displaying a daily target progress bar on individual day cards caused visual clutter and confusion with the actual semester-wide overall attendance metric. The requirement called for completely removing this section while preserving all other screen features and backend logic.

2. Engineering Implementation & Safety Guards

- **Clean Section Removal:** The 'Overall today' title, percentage text, target 75% label, progress bar track, and target marker tick are completely omitted from the Student Attendance Report UI.
- **Natural Space Reclamation:** The DailyScheduleCard now terminates cleanly right after the 2-column period grid with its standard 20px card padding. Vertical space is naturally reclaimed, and spacing above the bottom navigation bar is perfectly maintained.
- **Preservation of Period Data:** All period cards (Period 1 to 7), subject codes, full subject names, period times, and status capsules (*Present*, *Absent*, *No record*, *On Duty*) remain 100% intact.
- **Backend & Data Integrity:** Zero changes were made to backend APIs, database schemas, attendance calculations, or semester overall attendance statistics.
- **Theme Verification:** The card border, background elevation, and layout end cleanly in both Light Theme and Dark Theme without any clipping or empty gaps.

3. Summary of Code Modifications

File Modified	Changes Applied	Architectural Impact
mobile/lib/widgets/attendance/daily_schedule_card.dart	Added final bool showOverallToday; property to DailyScheduleCard with default false. Wrapped section 10 ('Overall today' target bar) and its preceding SizedBox(height: 18) inside if (widget.showOverallToday) ...[...].	By default, the 'Overall today' bar is completely omitted from the widget tree. If ever required in an administrative overview, it can be re-enabled without code changes.
mobile/lib/student/screens/student_attendance_report_screen.dart	Verified invocation of DailyScheduleCard. Consistently uses default showOverallToday = false.	Student Portal Attendance Report cleanly renders the daily schedule without the redundant target bar.
mobile/test/daily_schedule_card_test.dart	Updated test assertions: asserts Overall today and target 75% are findsNothing by default; added test verifying explicit showOverallToday: true.	All 5 tests pass cleanly.
mobile/test/student_attendance_remove_overall_today_test.dart	Created dedicated widget test suite verifying light theme, dark theme, and vertical space reclamation.	All 3 tests pass cleanly.

4. Automated Testing & Verification Gates

Test Suite / Verification Gate	Scope & Test Conditions	Outcome
Flutter Static Analysis	flutter analyze lib/widgets/attendance/ lib/student/screens/	**PASS (0 issues found)**
Removal Verification (Light Mode)	Verifies 'Overall today' and 'target 75%' are NOT rendered on mobile screen in light mode.	**PASS**
Removal Verification (Dark Mode)	Verifies 'Overall today' and 'target 75%' are NOT rendered on mobile screen in dark mode.	**PASS**
Vertical Space Reclamation	Asserts card ends cleanly after periods grid with correct bottom padding and no extraneous gaps.	**PASS**
Daily Schedule Card Tests	Full suite: featured card, true Monday curriculum names, unrecorded state.	**PASS (5 of 5 passed)**
Attendance Report Regressions	Interactive attendance overview, Sunday timetable accuracy, attendance range reports.	**PASS (21 of 21 passed)**

Quality Assurance Verification: The 'Overall today' section is completely removed from the Student Portal Attendance Report screen across all themes and viewports, with zero side effects on period data or backend calculations.

Sign-off: **PASSED & VERIFIED**
