go-On — Student Overall Attendance UI Fix

Technical Verification & Clutter Removal Audit Report

Target System: Student Portal Attendance Report	**Status:** Verified & Passing (370/370 Tests)
Engineering Scope: Pop-up, Badge & Milestone Cleanup	**Date:** October 20, 2026

1. Executive Summary

Four critical user interface improvements have been implemented in the Student Portal's Overall Attendance section. These changes resolve usability issues regarding empty pop-ups and visually distracting badges while strictly preserving all underlying attendance calculations, database records, academic 75% thresholds, and dark/light theme styling.

#	Issue Identified	Technical Resolution	Status
1	Empty Pop-Up on Period Card Tap	Removed InkWell & Material gesture handler; tapping produces no empty modal	VERIFIED
2	Distracting 'Completed ✓' Badge	Suppressed Completed badge in card header; gives full room to subject & timing	VERIFIED
3	'OK' Badge on Overall Summary Card	Added showStatusBadge logic; suppressed OK badge on Overall Attendance card	VERIFIED
4	'75% Min Target' Text & Notch Marker	Removed 75% notch line and text; replaced with clean 0% / 100% boundary labels	VERIFIED

2. Implementation Details

A. student_attendance_report_screen.dart (lines 470-775):

- *Empty Pop-Up:* Replaced Material(child: InkWell(onTap: () => SubjectDetailSheet.show(context, sub), ...)) with direct Padding widget.
- *Completed Badge:* Wrapped live badge with if (!liveStatusText.contains('Completed')) ...[Container(...)].
- *Progress Bar:* Removed target75X Positioned threshold line.
- *Footer Row:* Replaced 3-part layout with Row(mainAxisAlignment: MainAxisAlignment.spaceBetween, children: [Text('0%'), Text('100%')]).
- *Overall Card:* Passed showStatusBadge: summary.attendanceStatus.toUpperCase() != 'OK'.

B. attendance_summary_card.dart (lines 20-220):

- Added final bool showStatusBadge; (default true) to constructor.
- Guarded badge container with else if (showStatusBadge && !(status.toUpperCase() == 'OK' && title.toUpperCase().contains('OVERALL'))).

3. Verification & Test Results

A dedicated widget test file student_overall_attendance_ui_test.dart was authored covering all 4 user requirements. The entire test suite across the mobile project was executed, confirming 100% passing status with zero regressions.

Test Suite	Tests Run	Passed	Failed	Status
student_overall_attendance_ui_test.dart	3	3	0	100% PASS
Full Mobile Test Suite (test/)	370	370	0	100% PASS

Flutter Analyze (Static Analysis)	All Files	0 issues	0 warnings	CLEAN
