go-On AI Face Attendance System

Timetable Session Pop-Up Simplification Across All User Roles

Status: SIMPLIFIED_&_VERIFIED
Date: October 20, 2026
Portals: Student, Faculty, Class Adviser
Tests Passing: 367 / 367 (100%)

Executive Summary: In accordance with user specifications, the timetable session details pop-up modal has been redesigned and unified across all three portals (Student, Faculty, and Class Adviser). All extraneous elements—including subject banner, subject name, class name, venue, period category, duplicate time tags, and the Attendance Report button—have been completely removed. The pop-up now renders a clean, compact surface displaying **exclusively the assigned faculty member** and the **actual period timing in 12-hour IST with AM/PM**, along with an intuitive close action. The reusable component TimetableSessionPopUp has been verified across all roles, resolutions, and themes with 367/367 passing tests.

1. Content Audit: Elements Kept vs. Removed

UI Element / Section	Previous Pop-Up State	Updated Pop-Up State	Architectural Compliance
Assigned Faculty	Included in small secondary puck (e.g. 'Santhiya')	**Prominently Displayed:** 'Faculty: Santhiya'	Reads real assigned faculty; fallback 'Faculty not assigned'
Period Timing	Displayed redundantly in header and puck	**Prominently Displayed:** 'Time: 09:10 AM – 10:00 AM'	12-hour IST AM/PM formatting; fallback 'Time unavailable'
Subject Banner & Code	Large colored banner with 'FDS' badge	**REMOVED**	Preserved on screen timetable cards, removed from modal
Subject Full Title	Bold 18pt subject name text	**REMOVED**	Eliminates text clutter and redundant titling
Class Name / Course	Displayed course/class strings	**REMOVED**	Preserved in schedule header context
Venue / Room Info	Dedicated venue puck ('Lecture Hall')	**REMOVED**	Strictly adheres to faculty + timing specification
Period Type Badge	Badge displaying 'CORE THEORY' / 'LAB'	**REMOVED**	Removed from pop-up modal
Attendance Report Button	Large secondary action button	**REMOVED**	Unrelated report navigation eliminated
Close Action	Outlined small button	**Retained & Enhanced:** Primary full-width button + (X) header icon	Supports Android back-button & scrim tap dismissal

2. Cross-Role Integration & Reusable Architecture

User Portal	Screen & Timetable View	Card Tap Trigger	Integration Method
Student Portal	StudentTimetableScreen (Weekly Matrix & Daily Agenda)	Tapping any period card or timeline row	`TimetableSessionPopUp.showFromItem()`
Faculty Portal	FacultyDashboardScreen (Weekly Grid & Day Agenda)	Tapping weekly cell or non-today session card	`TimetableSessionPopUp.showFromFacultySchedule()`
Class Adviser Portal	FacultyClassAdvisorScreen (Class Schedule Tab)	Tapping any period in advised class matrix	`WeeklyMatrixTimetableView` → `showFromItem()`

3. Verification & Automated Test Results (367 / 367 Passed)

Test Suite Target	Scope Verified	Result
`timetable_session_pop_up_test.dart`	Dedicated test suite: 24h & 12h formatting, fallbacks, full exclusion audit, role triggers.	**7 / 7 PASSED**
`timetable_reference_design_test.dart`	Weekly matrix tap assertions updated for simplified modal (Faculty & Time verified).	**2 / 2 PASSED**
`faculty_and_advisor_timetable_matrix_test.dart`	Faculty & Class Advisor weekly matrix tap assertions updated for simplified modal.	**4 / 4 PASSED**

Entire Flutter Test Suite (flutter test test/)	Comprehensive regression coverage: 367 tests covering timetable, attendance, auth, and UI.	**367 / 367 PASSED**
Flutter Analyzer (flutter analyze)	Static linting, strict typing, zero unused imports/variables.	**0 ISSUES FOUND**
